We Transform Information Systems & Networks

We transform information systems and networks. Through assessing, understanding, and remediating vulnerabilities. We align cybersecurity practices with governance. We tackle today's challenges, which, in turn, secures your tomorrow.

PRIMARY CAPABILITIES

AUTHORITY TO OPERATE (ATO) PACKAGE SUPPORT

We develop complete ATO packages for information systems and networks at any classification level governed by AFIs, DAAPM, FISMA, HIPAA, JSIG, or NIST.

CYBERSECURITY ASSESSMENTS

We perform rigorous evaluations of security profiles and readiness of automated, physical, and technical controls, policy, procedures, and governance for CJIS, CMMC, DAAPM, HIPAA, NIST, and PCI.

CYBERSECURITY ENGINEERING

Capture, refine and integrate security into IT components products through purposeful security design and configuration. Identify critical assets and dependencies, develop measures and policies commensurate to risk profile.

CYBERSECURITY GOVERNANCE

We help define risk management policies, strategy, and goals.

CYBERSECURITY LIFECYCLE SUPPORT (STAFF AUGMENTATION)

We provide qualified and experienced staff to perform cybersecurity duties from initiation to close-out to meet the demand of growing cybersecurity responsibilities.

VULNERABILITY ASSESSMENTS

We perform Tenable and SCAP scans pinpointing operating systems, applications, and configuration vulnerabilities within Information Systems and Networks.

COMPLEMENTARY CAPABILITIES

SPECIAL ASSESS PROGRAM & SENSITIVE COMPARTEMENTED INFORMATION SECURITY MANAGEMENT

We provide cradle to grave security support for sensitive and special programs. We sustain programmatic excellence in classification management, program security, personnel security, physical security per the DoD Manuals and Intelligence Community Directives.

IT SUPPORT SERVICES

We help develop and transform customers' current IT posture with contemporary, agile, effective, and secure resolutions. We support the installation and maintenance of information systems and networks. We oversee the successful implementation, integration, and execution of short-, and long-term IT projects.
